

## **APPENDIX 1**

### Options for consideration to improve recycling levels

#### **Improved education/communication with residents**

- Improve resident understanding on what can / cannot be recycled
- Improved education and engagement through schools, community and local groups
- Improved information through digital media (website, social media, my account)

#### **Undertaking stricter enforcement of what is placed in the residual waste (black) bin**

- Enforcement action when recycled material is placed in the black bin.
- Enforcement action when waste or recycled material is put in the wrong container.

#### **Changing the frequency of collection of the residual waste (black) bin**

- Reducing collection frequency for black bin collection to once every three or four weeks
- Maintain fortnightly brown bin collections (March – Mid-December)

#### **Reducing the size of the residual waste (black) bin**

- Maintaining the current frequency of collection while reducing the size of the black bin
- Maintain weekly recycling collections
- Maintain fortnightly brown bin collections (March – Mid-December)
